SUMMARY

Software Developer with hands-on experience building scalable SaaS and enterprise web applications using React.js, Redux Toolkit, RTK Query, and Node.js. Proven ability to deliver production-ready features across HRMS, attendance management, and admin platforms. Strong expertise in component-driven architecture, API integration, performance optimization, and secure authentication workflows.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++

Frontend: React.js, Next.js, React Hooks, Redux Toolkit, RTK Query, Tailwind CSS, Shadcn UI, Framer Motion, Chart.js

Backend: Node.js, Express.js, RESTful APIs, Nodemailer, Next.js API Routes, Middleware, REST Architecture

Databases: MongoDB

Cloud & DevOps: AWS S3, AWS Lambda, Vercel, Render, CI/CD Pipelines, Environment Configuration

Security: JWT Authentication, Role-Based Access Control (RBAC), Encryption/Decryption

Developer Tools: Git, GitHub, Postman, VS Code

EXPERIENCE

Software Developer

Vitorscape Technologies

June 2025 – Present

Mumbai, India

Tech Stack: React.js, Redux Toolkit, RTK Query, Node.js, Chart.js, AWS S3, AWS Lambda

- Built and maintained scalable **SaaS web applications** for **HRMS**, attendance tracking, approval workflows, and payroll operations across **JRC** and **Haarji** platforms serving enterprise clients
- Architected reusable, **component-driven** in **React.js**, reducing code duplication and accelerating feature delivery across multiple modules
- Implemented **Redux Toolkit** for centralized state management with reusable reducers and **RTK Query** for optimized API caching, automated re-fetching, and **backend-driven pagination**
- Integrated **RTK Query** endpoints and built dynamic dashboards, filters, tables, approval flows, and **Chart.js** visualizations to support real-time data operations and analytics
- Enforced application security via **Role-Based Access Control (RBAC)**, **JWT authentication**, and client-side **encryption/decryption** leveraged **AWS S3** and **Lambda** for scalable storage and deployment workflows
- Improved performance through **lazy loading**, **memoization**, and optimized re-rendering strategies enhanced UX with **responsive layouts**, **dark mode**, and reusable modal systems

PROJECTS

Next Boarding | React.js, Node.js, Express.js, MongoDB, Redux Toolkit | [GitHub](#) | [Demo](#)

- Built a **full-stack travel booking platform** featuring **real-time seat selection**, booking lifecycle management, and **RESTful APIs** for trip and user data operations
- Implemented **JWT-based authentication** with email verification, password recovery, and automated booking confirmation emails via **Nodemailer**
- Managed global state using **Redux Toolkit** across multi-step booking flows, seat selection, and user session handling
- Designed a fully **responsive UI** with intuitive booking workflows, interactive seat maps, and real-time availability feedback to enhance user experience across devices

Admin 360 | Next.js, MongoDB, Redux Toolkit, Chart.js, JWT | [GitHub](#) | [Demo](#)

- Developed a full-featured **admin dashboard** using **Next.js SSR** and API routes for managing customers, orders, and products with real-time **Chart.js** data visualizations
- Enforced security via **JWT authentication** and **Role-Based Access Control (RBAC)**, restricting endpoint and feature access by user role
- Optimized performance through efficient **Redux** state management, streamlined **API fetching**, and reusable component architecture with **dark mode** and responsive layouts
- Integrated **Nodemailer** for automated admin notifications and built **dynamic filtering**, search, and pagination across all data tables for efficient record management

EDUCATION

Thakur College of Engineering and Technology

Bachelor of Technology in Internet of Things | **CGPI: 9.10**

Mumbai, India

2021 – 2025
