SUMMARY

Software Developer with hands-on experience in Java, Spring Boot, React.js, MySQL, and REST API development. Experienced in building enterprise web applications, developing secure backend services, and collaborating in Agile Scrum teams. Passionate about building scalable, high-quality software and continuously learning modern Java technologies.

TECHNICAL SKILLS

Languages: Java (Core), JavaScript (ES6+)

Backend: Spring Boot, Spring MVC, Spring Security, REST APIs, API Development, Node.js, Express.js, Hibernate/JPA, Microservices, Middleware

Frontend: React.js, HTML5, CSS3, Redux Toolkit, React Hooks, Tailwind CSS, Shadcn UI

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, Maven, Postman, VS Code, Docker, Jenkins

Cloud & DevOps: AWS, CI/CD Pipelines, Environment Configuration

Software Engineering: Object-Oriented Programming (OOP), Agile Scrum, SDLC

EXPERIENCE

Software Developer

Webxces Technologies

Jan 2025 - Present

Mumbai, India

Tech Stack: Java, Spring Boot, Spring Security, React.js, MySQL, REST APIs

- Developed and maintained scalable enterprise web applications using **Java**, **Spring Boot**, **React.js**, and **MySQL**, following object-oriented programming principles.
- Designed, developed, and integrated secure **RESTful APIs** using **Spring Boot** to enable seamless communication between frontend and backend systems.
- Implemented **Spring Security** and **JWT Authentication** to secure application authentication and authorization.
- Built reusable and responsive user interface components using **React.js** and integrated them with backend APIs to deliver scalable enterprise solutions.
- Collaborated with cross-functional teams in an **Agile Scrum** environment, participating in feature development, debugging, code reviews, testing, and production support.
- Used **Git** for version control, managed application data using **MySQL**, and contributed to software delivery following modern development best practices.

PROJECTS

Next Boarding | *React.js, Node.js, Express.js, MongoDB, Redux Toolkit* | [GitHub](#) | [Demo](#)

- Built a **full-stack travel booking platform** featuring **real-time seat selection**, booking lifecycle management, and **RESTful APIs** for trip and user data operations
- Implemented **JWT-based authentication** with email verification, password recovery, and automated booking confirmation emails via **Nodemailer**
- Managed global state using **Redux Toolkit** across multi-step booking flows, seat selection, and user session handling
- Designed a fully **responsive UI** with intuitive booking workflows, interactive seat maps, and real-time availability feedback to enhance user experience across devices

Admin 360 | *Next.js, MongoDB, Redux Toolkit, Chart.js, JWT* | [GitHub](#) | [Demo](#)

- Developed a full-featured **admin dashboard** using **Next.js SSR** and API routes for managing customers, orders, and products with real-time **Chart.js** data visualizations
- Enforced security via **JWT authentication** and **Role-Based Access Control (RBAC)**, restricting endpoint and feature access by user role
- Optimized performance through efficient **Redux** state management, streamlined **API fetching**, and reusable component architecture with **dark mode** and responsive layouts
- Integrated **Nodemailer** for automated admin notifications and built **dynamic filtering**, search, and pagination across all data tables for efficient record management

EDUCATION

Thakur College of Engineering and Technology

Bachelor of Technology in Internet of Things | **CGPI: 9.10**

Mumbai, India

2021 – 2025
