SUMMARY

Software Developer with 2+ years shipping performant, production-grade web applications using React.js, JavaScript (ES6+), Redux Toolkit, and RTK Query, plus server-side work in Node.js and Express.js. Focused on RESTful API integration, frontend component performance, and rendering optimization. Uses modern AI coding assistants (GitHub Copilot, Cursor) to speed up development, debugging, and test automation. Collaborates in agile, cross-functional teams to ship reliable, user-friendly interfaces.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, C++
Frontend: React.js, Next.js, React Hooks, Redux Toolkit, RTK Query, Tailwind CSS, Shadcn UI, Framer Motion, Chart.js
Backend: Node.js, Express.js, REST APIs, Next.js API Routes, Middleware, Nodemailer
Databases: MongoDB
Cloud & DevOps: Vercel, Render, CI/CD Pipelines, Environment Configuration
Security: JWT Authentication, Role-Based Access Control (RBAC), Encryption/Decryption
Developer Tools: Git, GitHub, Postman, VS Code

EXPERIENCE

Software Developer
Webxces Technologies

July 2024 - Present
Mumbai, India

Tech Stack: React.js, Redux Toolkit, RTK Query, Node.js, Chart.js, MongoDB

- Developed and maintained scalable **SaaS web applications** for HRMS, attendance management, approval workflows, and payroll operations, delivering production-ready features for enterprise customers.
- Built reusable, **component-based** user interfaces using **React.js**, improving code maintainability, reducing duplication, and accelerating feature delivery across multiple modules.
- Integrated **REST APIs** using **RTK Query** with automated caching, re-fetching, backend-driven pagination, filtering, and centralized state management through **Redux Toolkit**.
- Translated UI designs into responsive, cross-browser compatible interfaces and developed interactive dashboards, tables, approval workflows, filters, and **Chart.js** visualizations for real-time business operations.
- Implemented secure authentication and authorization using **JWT**, **Role-Based Access Control (RBAC)**, client-side encryption/decryption.
- Improved application performance through **lazy loading**, **memoization**, optimized rendering, and reusable components, delivering responsive layouts, dark mode support, and an enhanced user experience.
- Collaborated with designers and backend developers in an Agile environment to develop, debug, test, and deploy production-ready frontend features.

PROJECTS

Next Boarding | *React.js, Node.js, Express.js, MongoDB, Redux Toolkit* | [GitHub](#) | [Demo](#)

- Developed a **full-stack travel booking platform** using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, supporting real-time trip search, seat selection, and booking management through **RESTful APIs**.
- Implemented a multi-step booking flow and interactive seat-map interface with **Redux Toolkit**, ensuring real-time availability updates across devices.
- Established secure **JWT authentication**, email verification, and password recovery, along with automated booking confirmations via **Nodemailer**.
- Enhanced performance and maintainability through centralized state management and reusable components.

Admin 360 | *Next.js, MongoDB, Redux Toolkit, Chart.js, JWT* | [GitHub](#) | [Demo](#)

- Developed a full-stack **admin dashboard** using **Next.js** and **MongoDB** to streamline the management of customers, products, and orders.
- Integrated **Chart.js** visualizations with filterable, paginated data tables to support real-time business analytics.
- Enforced secure access control using **JWT authentication** and **Role-Based Access Control** at the API level.
- Improved scalability and operational efficiency through automated **Nodemailer** notifications and optimized state management.

EDUCATION

Thakur College of Engineering and Technology
Bachelor of Technology in Internet of Things | **CGPI: 9.10**

Mumbai, India
2021 – 2025
