SUMMARY

Full Stack Developer with 1+ year of hands-on experience building and maintaining real-world web applications using the MERN stack. Skilled in React.js, JavaScript, Redux Toolkit, Node.js, Express.js, MongoDB, and REST APIs, with experience in frontend and backend development, API development and integration, authentication, role-based access control, debugging, and performance optimization. Currently contributing to a SaaS-based Workforce Management System across both frontend and backend.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frontend: React.js, React Hooks, Context API, Redux Toolkit, RTK Query, Tailwind CSS, Shadcn UI, Chart.js, Responsive Design

Backend: Node.js, Express.js, REST APIs, Middleware, Nodemailer

Database: MongoDB

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC)

Cloud & Deployment: Vercel, Render, Environment Configuration

Developer Tools: Git, GitHub, Postman, VS Code, Chrome DevTools, Figma

EXPERIENCE

Software Developer

Vitorscape Technologies

July 2025 - Present

Mumbai, India

Tech Stack: MongoDB, Express.js, React.js, Node.js, Redux Toolkit, Chart.js

- Develop and maintain a **MERN Stack SaaS-based Workforce Management System** supporting employee management, attendance, payroll, leave, and approval workflows.
- Built reusable and responsive **React.js** components using **JavaScript**, **React Hooks**, **Context API**, and **Redux Toolkit**, developing scalable and modular frontend solutions across application modules.
- Developed and integrated **REST APIs** using **Node.js** and **Express.js**, implementing backend functionality and database operations with **MongoDB**, while integrating APIs with the frontend through **Redux Toolkit**.
- Implement **authentication**, **role-based access control**, **pagination**, **filtering**, and **API integrations** across multiple application modules while optimizing performance through lazy loading and efficient data handling.
- Debug frontend and backend issues, perform testing and performance improvements, and collaborate with the development team through **Git-based workflows** and Agile practices.

PROJECTS

Next Boarding | *React.js, Node.js, Express.js, MongoDB, Redux Toolkit* | [GitHub](#) | [Demo](#)

- Developed a **full-stack travel booking platform** using **React.js**, **Node.js**, **Express.js**, and **MongoDB**, enabling users to search trips, select seats, and manage bookings through **REST APIs**.
- Built interactive frontend features using **React.js**, **React Hooks**, and **Redux Toolkit**, including multi-step booking flows, trip search, and interactive seat maps.
- Developed backend APIs using **Node.js** and **Express.js**, with **MongoDB** for managing trips, users, seats, and booking data.
- Implemented **JWT authentication**, **email verification**, **password recovery**, **role-based access control**, and booking confirmation emails using **Nodemailer**.

Admin 360 | *Next.js, MongoDB, Redux Toolkit, Chart.js, JWT* | [GitHub](#) | [Demo](#)

- Developed a **full-stack admin dashboard** using **Next.js**, **MongoDB**, and **API Routes** for managing customers, products, and orders with interactive **Chart.js** visualizations.
- Built dashboard interfaces using **Next.js**, **JavaScript**, and **Redux Toolkit**, implementing data tables, search, filtering, pagination, and dark mode.
- Developed and integrated backend APIs using **Next.js API Routes** and **MongoDB** for application data and business operations.
- Implemented **JWT authentication**, **Role-Based Access Control (RBAC)**, **protected API routes**, and automated email notifications using **Nodemailer**.

EDUCATION

Thakur College of Engineering and Technology

Bachelor of Technology in Internet of Things | **CGPI: 9.10**

Mumbai, India

2021 – 2025
